Topology and its Applications 91 (1999) 273

TOPOLOGY AND ITS APPLICATIONS

Author Index *

Volume 91 (1999)

Buck, G. and J. Simon, Thickness and crossing number of knots	(3) 245–257
Collins, P.J., Extensions of topological spaces with strongly-discrete remainder	(1) 47– 50
Dow, A., A *not too dense* subset of N^*	(1) 79– 85
Durumeric, O., see Litherland, R.A.	(3) 233–244
Fedorchuk, V.V., On a preservation of completeness of uniform spaces by the functor P_τ	(1) 25– 45
Flagg, B., see Kopperman, R.	(2) 169–180
Fujii, S. and T. Nogura, Characterizations of compact ordinal spaces via continuous selections	(1) 65– 69
Gartside, P.M., Monotone normality in products	(3) 181–195
Hjorth, G., A universal Polish G-space	(2) 141–150
Holá, L'., Complete metrizability of generalized compact-open topology	(2) 159–167
Houston, K., Images of finite maps with one-dimensional double point set	(3) 197–219
Kombarov, A.P., On F_σ-δ-normality and hereditary δ-normality	(3) 221–226
Kopperman, R., P. Sünderhauf and B. Flagg, Smyth completion as bicompletion	(2) 169–180
Koschorke, U., Complex and real vector bundle monomorphisms	(3) 259–271
Krzemińska, I. and J.R. Prajs, A non-g-contractible uniformly path connected continuum	(2) 151–158
LaBerge, T., A space with normal countable-to-one regular preimages	(3) 227–232
Litherland, R.A., J. Simon, O. Durumeric and E. Rawdon, Thickness of knots	(3) 233–244
Nagata, J., Remarks on metrizability and generalized metric spaces	(1) 71– 77
Nogura, T., see Fujii, S.	(1) 65– 69
Nyikos, P.J., On some non-Archimedean spaces of Alexandroff and Urysohn	(1) 1– 23
Prajs, J.R., see Krzemińska, I.	(2) 151–158
Rawdon, E., see Litherland, R.A.	(3) 233–244
Shakhmatov, D., A comparative survey of selected results and open problems concerning topological groups, fields and vector spaces	(1) 51– 63
Shibakov, A., Countable Fréchet topological groups under CH	(2) 119–139
Simon, J., see Buck, G.	(3) 245–257
Simon, J., see Litherland, R.A.	(3) 233–244
Sünderhauf, P., see Kopperman, R.	(2) 169–180
Tomita, A.H., A group under $\mathrm{MA}_{\mathrm{countable}}$ whose square is countably compact but whose cube is not	(2) 91–104
Wicke, H., Not all realcompact spaces are ultrapure	(1) 87– 90
Ye, X., On inverse limit spaces of maps of an interval with zero entropy	(2) 105–118
